

SPS-3W5-5V

1st Apr, 2024, Rev1

This power supply module can be used to power from DIY to any industrial projects that need AC to DC conversion. The module is capable of supplying full load current constantly for longer period. Thus, making it perfect choice for all types of loads.

With the aim to promote **MAKE IN INDIA**, this power supply module boasts following features:

1. Input supply voltage: 220VAC
2. Output Voltage: 5VDC
3. Output Current: 700mA
4. Output Power: 3.5W
5. Output overload detection and trip at 1A
6. Output short circuit protection
7. Higher efficiency
8. Low power consumption
